SenzIT ™ | Sensing Future IT

Towards a
Better World!

Smarter Government

Smarter
Government

Using technology to build intelligent, more innovative and more accountable government for its citizens

Senzit, with its ability to sense the future of IT, has successfully pioneered the idea of Smarter Government. It has taken up the challenge of "doing more with less". Our government solutions, technology and consulting can help you improve citizen services, build intelligent transportation systems, improve public safety, strengthen national security, and manage resources more effectively. Approaches that use analytics, shared services and collaboration will enable tangible and real transformation that benefits the public, government and the society at large.

Key features of our Smarter Government include

- Cyber Security Solution

- Better management and analysis of geospatial data with the help of Geographic Information System (GIS)

- Defense Operation Platform

- Intelligent Operations Centre

- Security Solutions

- Integrated Fare Management for Transportation

- Integrated Transportation

- Smarter Performance Management system

- Public Safety

- Tactical data links solution for safe communication of ships, submarines, aircraft and land-based units

- Cloud Computing
